Summary

I am currently studying for a Bachelor's degree in Technology, specializing in Computer Science Engineering at Adamas University. My focus lies in areas such as UI/UX design, graphics, and web/app development, where I am driven by a passion for problem-solving. Alongside this, I have developed skills in team management and enjoy the process of self-directed learning. In addition to my academic pursuits, I actively contribute to university projects and play a key role in ensuring the success of campus events as the event manager.

Education

ADAMAS UNIVERSITY (India) Bachelor of Technology in Computer Science and Engineering	Oct 2021 - Present
• CGPA: 8.1/10.0	
Shaheed Bir Bikram Ramijuddin Cantonment College (Dhaka Cantonment, Bangladesh) Higher Secondary	Passing year- 2020
• GPA: 5.00/5.00	
Banani Bidyaniketan School and College (Dhaka , Bangladesh) Secondary	Passing year-2018
• GPA: 5.00/5.00	

Relevant Coursework

• Data Structure	• Internet of Things	• Database Management System
• Design Analysis & Algorithm	• Object-Oriented Programming	• Big Data and Analysis
• Operating System	• Formal Language and Automata	• Computer Architecture

Experience

Research Intern , Jadavpur University	July 2024- September 2024
• Worked on BVLOS (Beyond Visual Line of Sight) drones for obstacle height measurement.	
• Developed both manual and automated approaches using machine learning techniques.	
• Utilized geospatial data and image processing techniques for accurate obstacle detection.	
• Applied Canopy Height Model (CHM) and QGIS for spatial data analysis.	
CTO & Operational Manager , skillZmap (Startup)	July 2024 - Present
• Leading the technical operations and management of a growing startup, overseeing the development of innovative products and solutions.	
• Collaborating with cross-functional teams to execute the company's vision and ensure the successful delivery of projects.	
• Managing and scaling the startup's technical infrastructure and operations for optimal growth.	
Web Developer & UI/UX Designer , Blanc Technologies	June 2022 - 2023
• Developed and maintained web application.	
• Collaborated with designers and back-end developers to ensure a successful integration of web applications.	
• Developed a UI/UX design for a mobile application.	
• Implemented front-end features and optimized UI/UX design.	

Graphic & Content Creator , Branding Team of Adamas University

August 2023 - July 2024

- Designed captivating graphics for brand identity and marketing materials.
- Created engaging content to effectively convey key messages.
- Collaborated with team members to meet deadlines and ensure quality control.
- Assisted in maintaining a cohesive visual representation within the Branding Team.

Technical Skills

- **Languages:** Python (Intermediate), Java (Intermediate), C, HTML/CSS, JavaScript, SQL
- **Developer Tools:** VS Code, Google Colab, Jupyter Notebook, PyCharm
- **Technologies/Frameworks:** Flask, GitHub, WordPress
- **Databases:** MongoDB, MySQL

Conference Paper

A LLM and Explainable AI Assistive Model for Improvement of User's Query in a Chatbot for Women Cancer Awareness for Indian Lay People

Jan 2025

Tapu Shekhar Saha, Jhilam Mukherjee, Madhuchanda Kar, Amlan Chakrabarti, Krishnendu Guha

9th International Conference on Data Management, Analytics Innovation (ICDMAI 2025), 2025

(Accepted for publication)

Projects

Implementation of a Privacy Preserving LLM and XAI Assistive Model for Improvements of Users' Query in a Cancer Awareness Chatbot

Jul 2024 - Dec 2024

- Developed a privacy-preserving large language model (LLM) integrated with Explainable AI (XAI) to enhance user query processing for a cancer awareness chatbot, focusing on the privacy of sensitive user data.
- Tools Used: Python, XLNet, SHAP, Integrated Gradients.

AR Enabled Double Helical Structure of DNA

Aug 2022 - Jan 2023

- Developed an AR-based 3D DNA model for immersive and interactive learning, allowing users to explore the double helix structure beyond traditional 2D diagrams.
- Tools Used: Unreal Engine, Blender

GLAS (Gas Leakage Alert System)

May 2022 - Jun 2022

- Designed a device that detects LPG leaks at home, triggers an alarm, and sends a message to the user's mobile device upon detection.
- Tools Used: Arduino UNO, C & C++ (Programming Languages)

Teethly - Dental Abnormalities Detection Website

Sept 2023 - Present

- A website that detects dental abnormalities like caries based on live dental images.
- Tools Used: HTML, CSS, JavaScript, Deep Learning, Database Management

Chatbot for Coal Mining Industries

Aug 2023 - Sept 2023

- Developed a chatbot to provide quick access to critical information on acts, rules, and regulations for the coal mining industry.
- Tools Used: HTML, CSS, JavaScript, Supervised Learning

Certifications

AWS Academy Graduate - AWS Academy Introduction to Cloud Semester 1

Aug 17, 2023

- Issued by Amazon Web Services Training and Certification
